# Generative AI in Common Apps/Platforms for Students

| APP/SERVICE | HIDDEN AI CABILITY | AGE REQUIREMENTS | CAN A PARENT/ADMIN ACTUALLY DISABLE IT? |
|---|---|---|---|
| **Google Chrome** | **Gemini is built into Chrome and can answer questions, summarize/interpret the current webpage, and use multiple open tabs as context.** | **Yes, 13+** | Yes, only if the teen remains supervised through Family Link. Parents can turn off Gemini in Chrome for supervised teens 13+. |
| **Google Classroom** | There is now a dedicated Gemini tab for students. Students can ask for help learning, quizzes, flashcards and study guides; Gemini can use the actual class assignment and materials as context. Google's Gemini Notebook can also turn material into audio/video overviews and study resources. | **Yes, if the Workspace for Education administrator enables student access.** | A school's Google admin determines whether students receive Gemini/Classroom access. |
| **Google Docs / Drive / Gmail / Chat / Calendar** | Gemini can work with Workspace material and search/summarize information across Gmail, Docs, Drive, Chat, Calendar, Keep, and Tasks. | Yes. For education accounts, availability is determined by school configuration and age restrictions. | Yes, A school's admin can disable at the Workspace administrator level. Parents can disable "smart features" through Family Link but the toggle off isn't enough. In child's account, you must adjust privacy settings. Calendar done separate than Gmail, Docs, & Drive. |
| **iPhone/iPad – Siri + Apple Intelligence** | Apple can send requests to ChatGPT from Siri, including text, images and files. ChatGPT does not require the standalone ChatGPT app to be installed. | **Yes, 13+ on Apple Intelligence enabled devices** | Yes. Screen Time can block Extensions, which blocks the ChatGPT integration. (Apple even warns parents they may wish to block AI assistance for school essays.) |
| **iPhone/iPad – Writing Tools** | Apple Intelligence can generate, rewrite, proofread and summarize text system-wide rather than inside an obvious AI app. | **Yes, 13+ on Apple Intelligence enabled devices** | Yes, Screen Time provides Apple Intelligence controls |
| **Microsoft Edge** | Copilot is built directly into the browser sidebar. It can research, answer questions, summarize webpages, videos and PDFs, and use browsing context. | **Yes, 13+ through eligible Microsoft accounts.** | Yes. School admin can disable Cipilot on managed school devices. Parents can disable Copilot through Microsoft Family Safety settings. NOTE: A student's ordinary toolbar toggle is not a parental lock. |
| **Microsoft 365 / school Microsoft account** | **Copilot Chat can provide general-purpose AI assistance through Microsoft's ecosystem. Microsoft also gives Education students a Study and Learn Agent that works from uploaded PDFs, Word docs, slides and webpages.** | **Yes, 13+. Students 13–17 must have access enabled by school admin** | Yes, controlled by the school's Microsoft tenant and age-gating settings. |
| **Microsoft Teams** | Students can launch Copilot or Microsoft's Study and Learn AI directly from an assignment when their school enables it. | **Yes, 13+, if enabled by the school's IT administrator.** | Yes, controlled by school admin; Microsoft's assignment-level “AI Guidelines” are only informational and do not technically stop outside AI use. |

# Generative AI in Common Apps/Platforms for Students

| | | | |
|---|---|---|---|
| **GroupMe** | Microsoft Copilot offers private 1:1 AI chat, answers questions, generates images, analyzes uploaded images, and can be invoked in groups. Experimental Mico can even join a group as an AI participant. | **Yes, 13+ or anyone who has parental permission for the app.** | No, parents can only toggle off in app settings, which can be turned back on. Group admins can set Message Copilot to 'Nobody,' but that only blocks Copilot inside that group, not the student's private Copilot chat. |
| **Canva** | **Magic Write can generate paragraphs, outlines, presentation notes and other writing. Canva AI can also brainstorm, generate text, images and code, and create entire designs from prompts.** | **Yes. Canva's AI products generally support users 13+, with additional Education controls.** | Yes, school admin can restrict AI under Canva for Education: Generative-AI apps are blocked for students by default, although administrators can enable them. No, for personal Canva accounts. |
| **Grammarly** | Its generative tools can draft, brainstorm, rewrite whole paragraphs and create new content. Newer Grammarly AI agents include tools such as a paraphraser, humanizer and AI Grader. | Yes. Students can use generative features where their account/organization permits them. | No, for personal Pro accounts; user can turn generative AI off and back on. Yes on Grammarly for Education: school admin can disable the AI Assistant, rewrites and other generative features for students. |
| **Quizlet** | Quizlet now explicitly markets a suite of AI tools: AI homework help, study guides, PDF summarization, practice tests, flashcard generation and explanations. | **Yes. Many features are aimed directly at students; free plans have limites AI access, Quizlet Plus grants access to all AI tools** | No parental PIN or consumer-level AI lock found. Parents should treat school-issued Quizlet accounts as AI-enabled |
| **Khan Academy / Khanmigo** | Khanmigo is an OpenAI-powered conversational tutor capable of ongoing AI chats, tutoring and writing assistance. | **Yes, including children through school/parent-supported Khan Academy arrangements.** | Yes, individual users can also disable Khanmigo, but it is not a parent-locked restriction.Parents can view their child's complete Khanmigo chat history, and schools/teachers have controls including Focus Mode. |
| **Notion** | Notion AI lives inside the notes/productivity workspace. It can chat, brainstorm, create and edit writing, summarize material, read uploaded files, search connected apps and perform tasks through Notion Agent. Even Free/Plus users receive limited complimentary AI responses. | Potentially yes, depending on account and plan. | Yes, Workspace owners/admins control some organizational AI capabilities. No forpersonal Notion accounts. Free and Plus plans are not AI-free; they offer a number of complementary AI responses. |
| **Zoom** | Zoom has moved far beyond meeting summaries. Its AI features can answer meeting questions, create documents and presentations, summarize material and perform AI-assisted tasks. | Students can encounter it through school or organizational Zoom accounts. | Yes, for managed accounts. School/account administrators can disable AI features and lock the setting so users cannot turn them back on. |
| **Adobe Express / Firefly in K–12** | Adobe Firefly generative AI can generate images and other creative content from prompts and is integrated into Adobe's school creative ecosystem. | **Yes. Adobe says Firefly-powered generative AI is enabled by default for K–12 educators and students.** | Yes, district admins can turn generative AI off through the Adobe Admin Console. |

# Generative AI in Common Apps/Platforms for Students

| | | | | |
|---|---|---|---|---|
|  | **GitHub** | **GitHub Copilot provides generative coding assistance, chat and other AI programming tools. Verified students can receive Copilot's premium features for free.** | Yes. 13+ and verified students can obtain Copilot Student. | School/organization admin have controls in managed environments, but a student's personal GitHub account does not offer disabling. |
|  | **Replit** | Replit is no longer simply an online code editor. Replit Agent can plan and build software conversationally, modify code and use specialized AI skills. | Replit permits users 13+, with parental permission required under 18. | No parental-level AI disable control; Code Intelligence can be switched off/on. |
|  | **Duolingo** | Duolingo Max includes generative-AI Roleplay and Video Call with Lily. Lily conducts spontaneous conversations, adapts to the learner, and can remember information from prior conversations. | Available to Duolingo Max subscribers | No; generative AI features offered only through MAX subscription |
|  | **Photomath** | Not a general-purpose LLM, but it is effectively an AI homework machine. Point the camera at a math problem and receive machine-generated solution steps and explanations. Photomath Plus adds AI-powered tutorials. | **Yes; it is designed for students.** | No, the entire app is AI homework help but does not general chatbot access. |
|  | **Brainly** | Homework help combines human answers/tutoring with AI support, putting AI assistance inside a familiar school-help application. | **Yes; 13+** | No robust parent-level AI disable controls |
